

MICRO-CONSOLE

for programming the converters

µConsole

A new generation miniaturised LCD console for programming and downloading programming files to the converters and transmitters of the ARDETEM range.

Programming with the micro-console

It allows :

- the visualisation of the measure and the status of the analog, relay and digital outputs,
- the visualisation and modification of the programming,
- the teleloading of programming files for duplication to other converters.

Description

• Display:

The graphical LCD allows:

- displaying the information (value of the measure, unit, status of the outputs) on 4 lines,
- using either mode portrait/landscape to display these data in case of horizontal mounting of the converter,
- visualising curves or histograms.

- The rear-lighting of the display allows using the console in little lit areas.

• A 4-key keyboard allows access:

- to the reading or modification of the programming,
- to the converter specific functions.

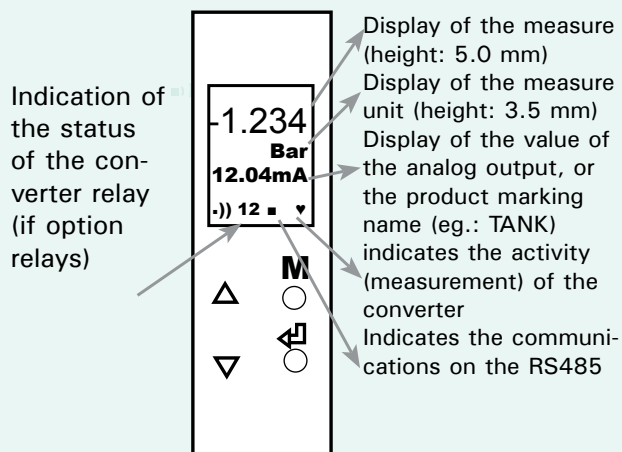

- Material: Self-extinguishing black UL 94V0 PA66

- IP 40 case

- CE marking

Dimensions

- Dimensions: (HxLxD) 80 x 26.5 x 20
